

VAPES CONTAIN THE SAME TOXIC CHEMICALS FOUND IN WEED KILLER

Designed with Alanis, age 15

VAPING:

PATH TO

ADDICTION

What do you think these chemicals do to your lungs?

Vapes contain acrolein, a key ingredient in weed killer. Vaping lodges toxic chemicals and heavy metals deep into your lungs and airways, causing damage.

VAPING:

PATH TO

ADDICTION

Is it really worth it?

Most vapes contain nicotine, even if the label says they don't. When you vape regularly, you develop a craving that can only be relieved by vaping. Soon you find it hard to function without a vape and become dependent.

VAPING:

PATH TO

ADDICTION

Is it really worth it?

Most vapes contain nicotine, even if the label says they don't. Children and young people become addicted to nicotine at lower levels compared to adults. Being exposed to nicotine while your brain is still developing impacts memory, attention and learning.

VAPING:

PATH TO

ADDICTION

Is it really worth it?

Vaping is connected to poorer mental health. When you vape regularly, you develop a craving that can only be relieved by vaping. This creates a vicious cycle, leading to more stress and anxiety.
